

Enzogenol® - Antioxidant Power – Vital Protection

Enzogenol® is a broad spectrum polyphenolic and flavonoid complex extracted by ENZO Nutraceuticals' patented pure water extraction process from the bark of New Zealand grown *pinus radiata*.

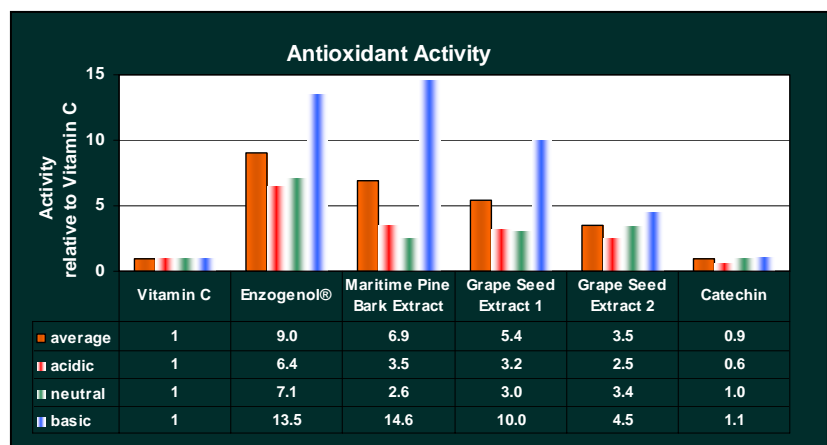

Enzogenol® is a superior antioxidant in comparative tests.

ANTIOXIDANT ACTIVITY STUDY

In vitro antioxidant testing, over a range of pH values that are encountered during digestion, shows that Enzogenol® is many times more effective against free radicals than Vitamin C, catechin, or other polyphenol extracts.

***In vivo* results from a clinical study show that Enzogenol® protects our body's building blocks: DNA and Proteins, from harmful oxidation.**

CLINICAL STUDY

Design: Open label study, 24 subjects, age 55-75, 12 weeks of:

+

In vivo
Plasma P
lood Leukocyte DNA Damage

Protein oxidation was significantly reduced by over 50% after 6 weeks of treatment.

Fig. 1. The effects of Enzogenol® supplementation on plasma protein carbonyls in older subjects (n = 24). The average reduction of protein carbonyl concentration after 6 (p < 0.0001) and 12 weeks (p < 0.0001) are highly significant. The values are mean ± SEM.

DNA damage in the blood leukocytes was significantly reduced by over 40% after 12 weeks of treatment.

This clinical study has shown that Enzogenol® acts as an effective antioxidant in humans. Enzogenol® protects our body from the everyday oxidative onslaught of free radicals that contribute to almost all diseases and play a causative role in human aging.
